

# THE FUTURE OF ENERGY IN THE ATLANTIC BASIN

Paul Isbell and Eloy Álvarez Pelegrý, Editors

The product of strategic collaboration between CTR and Orkestra (Basque Institute for Competitiveness) at Deusto University, this volume draws out a broad new view of the future of energy in the Atlantic Basin. The authors comprise a diverse range of Atlantic Basin energy thinkers and practitioners. They provide a multifaceted view of the new and evolving energy land- and seascapes of the Atlantic Basin, including the shale, offshore and low carbon revolutions. The overall result not only allows for new perspectives on a global sector in transformation but also helps reveal a new Atlantic world, grounded in emerging energy dynamics for cooperation.

Africa and Latin America are given special focus in recognition of the new “Southern Atlantic” as a key creative component in any new Atlantic Community. Other innovative perspectives are also showcased, including sub-state regional or municipal views and a new revealing angle of analytical vision provided by the “Atlantic energy seascape.” Energy policy and regulatory reform are analyzed from both traditional and “pan-Atlantic” points of view, while nascent “pan-Atlantic” cooperative mechanisms (like the Atlantic Energy Forum) are introduced.

#### Authors include

Benjamin Augé	Paul Isbell	Osmel Manzano
Macarena Larrea Basterra	Saliem Fakir	Eloy Álvarez Pelegrý
Manuel Bravo	Jeff Felten	Carlos Sallé
Mario Gabriel Budebo	Manisha Gulati	Louise Scholtz
Chris Cote	Mark Langevin	Steve Thorne
Ellen Davies
